

# TECHNICAL SPECIFICATION

## CABIN DISINFECTANT

Cabin Disinfectant is a disinfecting agent for pre-cleaned, hard surfaces in the aircraft. The non-corrosive formula is safe for use on metal (aluminium), plastic, (un)painted, rubber, leather, vinyl and Tedlar® surfaces. Aircraft cleaning and disinfection is recommended by the International Health Regulations of the World Health Organization (WHO). While cleaning refers to removal of visible dirt and/or particles, disinfection refers to control, deactivate or kill bacteria and viruses which can cause diseases, infections, etc. Cabin Disinfectant (step 2 of 2) is compatible with the Aero-Sense Cabin Cleaner (step 1 of 2).

**CERTIFICATION** **AMS 1452B**  
Disinfectant, Aircraft General Purpose

**Boeing D6-7127**  
Cleaning interiors of commercial and transport aircraft

**National Stock Number (NSN):**  
6840-13-122-7547

PROPERTIES	Physical state at 20°C	Liquid
	Colour	Colourless
	Odour	Characteristic
	pH value	± 7,0
	Solubility in water	Completely
	Flash point (°C)	≥ 100°C
	Freezing point (°C)	-60°C

**AVAILABLE IN**

- ☛ 750 ml spray bottle (ready-to-use liquid)
- 20 litre can (ready-to-use liquid)
- 5 litre can (concentrated liquid)

**SAFETY**

Review the Safety Data Sheet (SDS) before use.  
Shelf life:

- 12 months (ready-to-use liquid)
- 24 months (concentrated liquid)

**APPLICATION**

- Dilution ratio for liquid concentrate: 5%.
- Simply spray the diluted or ready-to-use product on the washable surface.
- Allow 5 minutes of contact time.
- Wipe clean. No rinsing required.
